

CIRCLON | HARDWARE SOLUTIONS

Circlon | Power Tower

Charge your valuable device fleet centrally in one place and keep it safe.

With our **Power Tower** charging cabinet, you can charge a variety of devices in a centralized location that is not only secure but also a real eye-catcher.

We have designed the lockable cabinet to be adaptable to your specific needs and, if desired, your design preferences. A cable management system ensures tidiness, while the steel coating and polycarbonate door provide safety and cleanliness. The material is radio-permeable, allowing your devices to still receive updates and send status messages.

By keeping all your popular devices together in one place, regardless of the manufacturer, you not only enhance practicality but also significantly extend the lifespan of your devices.

Designed with years of experience for the longevity of your equipment

- \ Dimensions: H: 2065 mm W: 680 mm D: 550 mm
- \ Steel coated housing
- \ Polycarbonate rotating door
